Creating website templates

Introduction:

Using myfreewebshop is a very quick & easy way to create eye catching & dynamic looking websites.

By changing the appearance and order of our website template features you can make very different styles to suit businesses corporate style & look.

Tips:

- When creating new graphics use the image dimensions grid on page 3. You always need to keep the same widths, but you can alter the height of an image
- Create your image at 300dpi to allow you to work with the graphics easier. Saving images - Once you have created you image, go to image size and re-save at 72 dpi
- Transparent images - save as a PNG file to display your image with a transparent background
- Website background images - you create colour full and eye catching website backgrounds for your site. i.e. Change the background colour of your website or include an image Use the [background_page](#) graphic to do this.
- Creating your new design/template - design your website on one document, then save each image separately and upload either individually or as a zip folder Remember only PNG or JPG files can be uploaded to Myfreewebshop.

Changeable images & graphics

This page plan will show you all of the changeable graphics.

You can also use the drag & drop tool (found in the design drop down menu) to alter the positions of search, newsletter subscription, category, checkout and banner boxes, along with the order of the info schroll bar, recently viewed items, home page text & image, and featured products.

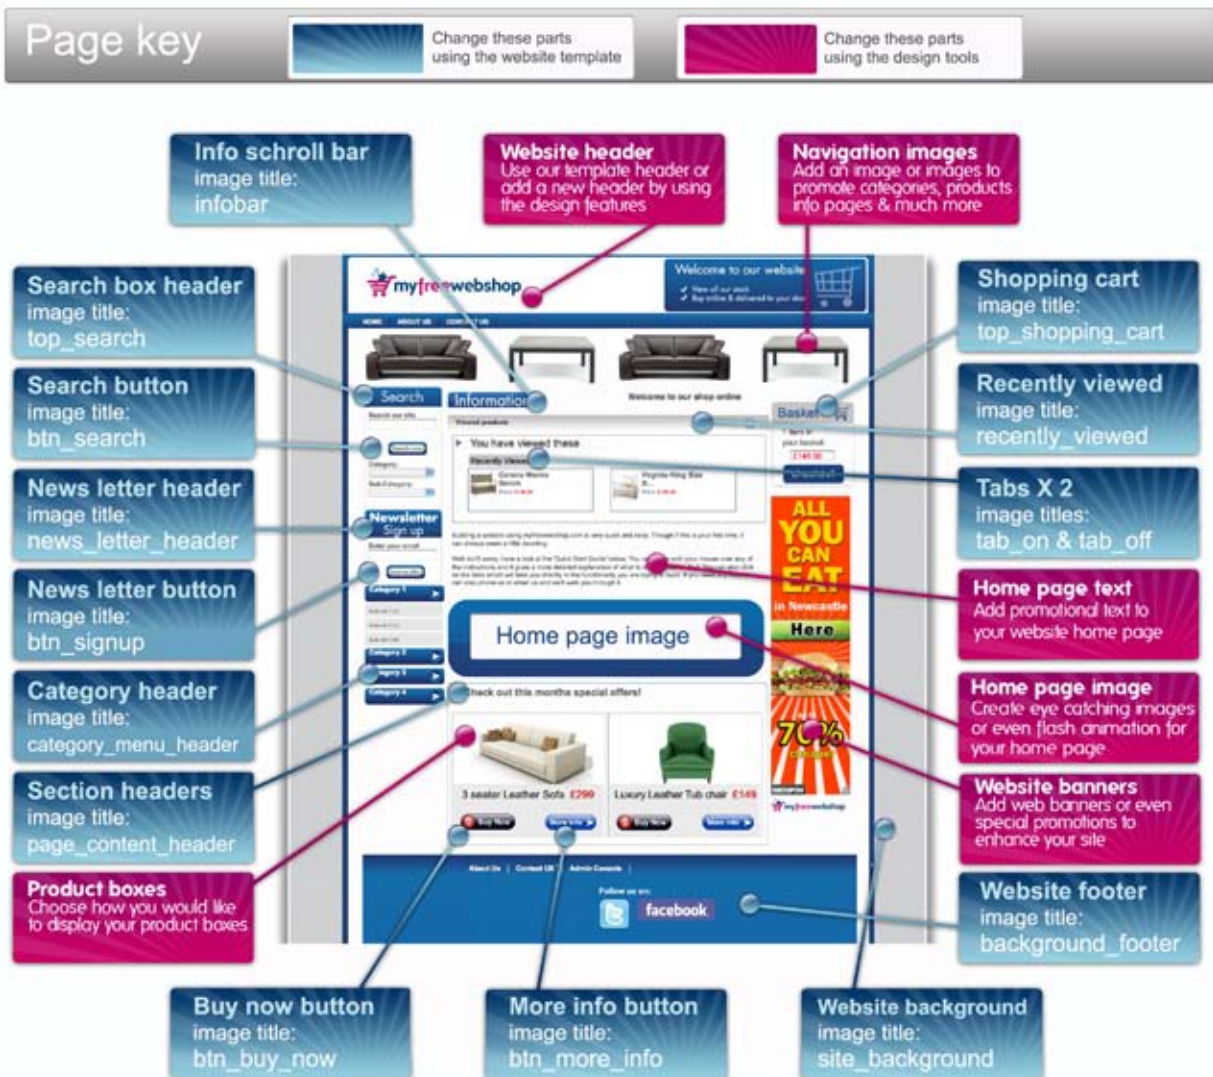

Image file names & dimensions

Changable graphics These are the areas of the website you can change	Graphic title The names the files have to be given	Width (Max) in CM	Height (Max)	Dpi image resolution
Search box header	top_search	5.47	1.41	72
button to activate search	btn_search	2.75	0.95	72
News letter sign up header	news_letter_header	5.47	2.01	72
button to send email address	btn_signup	2.75	0.95	72
Main category header	category_menu_button	5.72	1.23	72
Tab with active info	tab_on	5.04	0.95	72
Button/bar to see recently viewed products	recently_viewed	22.75	1.09	72
Header for a page	page_content	22.75	2.12	72
